

KEEP YOUR EMPLOYEES, CUSTOMERS & SUPPLIERS INFORMED

Employers need to be able to communicate effectively with their people, as well as others such as contractors, suppliers, and customers.

Hyper-Reach™ notification service leverages UKG Pro WFM to reach all or part of your workforce in minutes, by phone, text, email, and more.

Hyper-Reach™ turns the employee data in UKG Pro WFM into a quick contact database, easily updated with text and web-based tools. Employers can then use interactive text, phone, email and more to inform employees of location status, closures and reopenings. And employers can poll their workforce for availability, status, availability, and more.

Eliminate manual processes, save money, communicate faster, fill open shifts and get the job done.

KEEP YOUR KEY CONSTITUENCIES UP-TO-DATE WHEN CRITICAL EVENTS HAPPEN

Plant closures, travel restrictions, quarantine orders – both mandatory and otherwise, and other factors all threaten to disrupt normal business operations and require fast response and coordination of employees, supply chains and more. Let **Hyper-Reach™** do the work for you.

ALERT GROUPS IN SECONDS

With Hyper-Reach your messages are created and delivered in seconds.

SEND MESSAGE FROM ANYWHERE

Easy-to-use mobile app & web-based user interface let you send messages from anywhere with an internet connection or from any standard phone line.

MULTI-CHANNEL COMMUNICATION

Communicate across many channels at once: text, phone, email, social.

POWERFUL MESSAGE CONTROL

Schedule msgs for specific days & times, or create a timetable of repeating msgs. Create templates.

EASY REGISTRATION & UPDATE

Easy signup for employees, suppliers & customers to register for your alerts. They can use text, push notification, web forms & more to sign up for any list.

2-WAY COMMUNICATION

Find out if your people are safe & healthy, available to work & more.
